#### Description

The TEBM65C20F-8 Balanced-Mode Radiator (BMR) is an audio drive unit with an extended frequency response and wide directivity compared with a conventional drive unit. It combines the benefits of Tectonic bending-wave technology and pistonic modes of operation. It is ideally suited for compact audio applications that require a full-range, high performance acoustic solution. It features an advanced ferrite motor system for low cost.

A 4ohm version is also available.

**Operating conditions**

Condition	Value
Power handling (continuous, weighted pink noise)	30W
Burst power handling (weighted pink noise)	>60W
Operating temperature range	-20 to 55° C
Audio frequency range	60Hz to 20kHz

**Measured Response – on axis SPL**
