Description

The TEBM65C20F-4 Balanced-Mode Radiator (BMR) is an audio drive unit with an extended frequency response and wide directivity compared with a conventional drive unit. It combines the benefits of Tectonic bending-wave technology and pistonic modes of operation. It is ideally suited for compact audio applications that require a full-range, high performance acoustic solution. It features an advanced ferrite motor system for low cost.

An 8ohm version is also available.

Operating conditions

Condition	Value
Power handling (continuous, weighted pink noise)	30W
Burst power handling (weighted pink noise)	>60W
Operating temperature range	-20 to 55° C
Audio frequency range	60Hz to 20kHz

Measured Response – on axis SPL
